

FOR IMMEDIATE RELEASE

[Gregg Mosley, President and Founder of Biotest Laboratories, Inc., Nationally recognized as one of the 100 Most Notable People in the Medical Device Industry](#)

**Minneapolis, MN, September 2, 2008-**

Gregg Mosley, President and Founder of Biotest Laboratories, Inc., has been recognized in *MD&DI*, a national medical device trade journal, as one of the 100 Most Notable People in the Medical Device Industry.

Mr. Mosley is known and commended in the industry for publishing over 18 articles in the areas of sterilization, process validation and microbial management. Five of his articles have been referenced by recent international standards. He has created a new opportunity for the industry called "Managing Microbes", based on the concepts of Evariology.

Mr. Mosley's involvement in organizations such as the Association for Advancement of Medical Instrumentation (AAMI) and the International Standards Organization (ISO) has produced significant changes to medical device regulations.

As president and founder of Biotest Laboratories, Mr. Mosley has grown a local company from 1 to over 75 employees with expansion and growth in all service areas including medical product laboratory testing, manufacturing, steam sterilization, cleanroom testing, validation services and microbial management.

**[About Biotest Laboratories, Inc.](#)**

The company was one of the first laboratories in the region dedicated to medical product testing. Over the past 20 years medical device assembly/packaging, sterilization, cleanroom testing, master validation planning, training and consulting services were added to provide a full service offering to medical product manufacturers. For more information about Biotest Laboratories, Inc. and the services available, please visit [www.biotestlabs.com](http://www.biotestlabs.com) or email [info@biotestlabs.com](mailto:info@biotestlabs.com).
